## About This Game

Soul Searching is a narrative survival game about sailing away from your homeland.

You sail on your small primitive boat to a world of islands, dragons, and magic. You can learn about stories of people living on islands you chose to visit, discover dragons, catch fish, customize your boats, find ghosts, cast magic spells, and more.

Soul Searching leaves you in an open world without any tutorialization except telling you the buttons to play. There is not one correct path. There are a number of play styles you can choose, depending on your hunger for gold and better boats. You might get lost, but it won't take too long to find your way to the end.

Inspired by Ursula Le Guin's Earthsea series and movies like Life of Pi, Soul Searching is about growing up, leaving your homeland, standing on your own feet. It deals with themes like isolation, searching for meaning and direction, leading to depression and suicidal thoughts.

As the player, you are not a violent hero. The most violent thing you can do in this game is to catch fish to feed yourself. Other than that, it's a game of humble survival and peaceful travels. But in that humbleness you are challenged to survive in a world of merciless dragons and endless seas.

Made by a one man team spanning 3 years of development, Soul Searching is a very personal game. It tries exciting story-telling methods to convey feelings rarely conveyed in games. Since all code, art, music, everything is made by one person, it offers a special sense of authorship hard to find in other games.

---

Other than the single player story mode, game also offers a randomly generated mode from 1 to 4 local players. This offers replay value and requires players to work together to survive. More players, more need for resources, so more challenge, but more skills to survive.

Soul Searching invites you to its world of mysteries. Even though the main story play time is not that long, if you want to unlock every achievement in the game, you will have to get lost in this world.

Features:

- Around 3 hours of single player story mode
- Random mode from 1 to 4 players that randomly generates a map and requires players to work together to survive
- Creatures at sea: dragons, killer whales, and more
- Islands with lots of monologues, and other islands that are not populated by humans
- Magic skills that let you survive on sea more easily
- Player appearance customization (including gender and sexual interest customization)
- Day night cycle that affects gameplay in subtle ways
- Extensive soundtrack
- English and Turkish language support
- Supporting selectable control schemes: 4 players on Xbox gamepads, 2 players on keyboard, 1 player on mouse

Fun old school game. Reminds me a bit of kid icarus.

Issues I have are some of the projectiles seem to hit even when they shouldn't.. this game is cool. Really nice game. Good fun!!! Thanx. The gameplay was incredibly slow. Being able to fast-forward scenes, dialogue and player movement via keyboard would have definitely won me over but my impatience got the better of me. Could have panned out better but i'm very disappointed :( Purchased this earlier because even though i studied in finland as part of the intergration plan i still forget some words or simply don't know some words around the home, This dlc pack is really useful because it has fun activities to keep you engaged and wanting to try and beat your old scores.

Eddie Gluskin is my supreme gentleman <3. this version does not allow you to use a dj controller and is limited in otherways as well.

do not buy this unless you like trying to get everything done with a mouse, just save up for vdj pro

this was a waste of time and i wish i had not bought it

is it possible to get a refund?. Regarding the question....."Is it worth?"

I would say yes. I have played this game when it first released and remember it being plenty fun. Back in the day, I had a very bad rig (Intel Celeron 2.6ghz, Geforce 6200 256mb, and 1.5gb ram) I was lucky to run this game here lmao.

In terms of fun, its there. It borrows the Bullet Time that Max Payne is famous for and uses it in its own form, even though there is a lot of similarities.

Replayability? I dont think so. It has its nice campaign but for the aficianados like me, yes lol.

Worth? 4 dollars, are you kidding me? If you are worried about 4 dollars, you wont find it here. As far as I know the worst games to invest in are Infestation Stories, Bad Rats, Rambo and a couple of other ones.

If you are interested in 3rd person shooters and adrenaline packed shooters, this is an investment you will like.

I will update this thread as I play the game now and let you know about 16:9 support, controls, test of time and all of that.

Any questions, let me know!

UPDATE 1: Out of the bat, the game supports widescreen resolutions and multiple refresh rates up to 100hz. Really good for a game this old.

Difficulty: Really unforgiving lol. This game isnt impossible but it doesnt take it easy on you. You need to play this on normal and forgive its laser accuracy that enemies possess.

This game is painfully similar to Max Payne 2. They borrow the engine (I assume?) and have the same exact sound effect of the ingrams from MP2. Its ridiculous. Loosely based on the game. So dont be surprised if it reminds you of MP2!

. Man! Does this game have potential. Man! Does this game mess it all up. I love the setting, and the design, and a lot of the artwork and everything. This game has a mind-boggling amount of potential. The main issue is...it's a pretty poor game. The shooting is strange, the animation is laughable, the graphics are pretty poor, and the controls are awkward. So sad. I'd love to see this game get a remake, because it could be an amazing game, if it didn't have so many issues in the gameplay itself.. To start off...DLC is 7.99

You get 7 amazingly detailed cars

1962 250 GTO

1967 330 P4

1967 312V67

1984 GTO

2004 F2004

2017 812 Superfast

2017 SF70H

1.15 per car no racing game will offer you that but all that pricing on side

All cars have AMAZING SOUND..

Feel when driving each car is different...as it should be

---

Now this DLC pack got me most excited about SF70H (F1 2017)

Amazingly detailed F1 and even more is exciting to drive it

This DLC is really worth it. If you like old school cars or modern cars fast as hell...deffiently Big +. It can be funny if youre looking for basic arcade game like haxball, pong etc. to play with your friends at one computer.

Otherwise; I DO NOT RECOMMEND. Don't waste your money.

. Great game! Really fun! You quickly get used to the controls after a few attempts and then the fun starts with experimenting what moves you can do. The soundtrack is also excellent and adds to the fun and adventurous feel of the game. Well done!.

Honestly the game is not what I had hoped for. I was looking to have a game that allowed me a strong capitalist kind of approach. Let me bargain, set prices, treasure hunt. Now admitedly the game has this, but it's very limited.

The Npc's often want high prices for stuff whether it's garbage or not, you have almost no choice but to\u2665\u2665\u2665\u2665\u2665\u2665them off when bargaining, which the tutorial recomends you don't do.

You can set prices, but it's an akward system and you have to spend money for extra space very quickly in the game, also the price setting it's self is just a pain. Futhermore, you have no refence of anything so you also are forced to spend money on an"expert opinion."

As for teasure hunting, you basically have a lot of repeat items. By the 3rd games you've seen most of it. Lousy replay value. Everything was unlocked by the end of my first game, even though I only came in 2nd or 3rd.

Thankfully I paid a sale price but even then I'd not recommend it. So many things that coulda, shoulda, woulda....
